Subject: Customer Specific OFO

Notice Text:

This supersedes Notice 245346. On 6/16/2022, EGTS issued its PL-1 System Delivery Point Restriction (Notice ID 245232) directing customers to maintain ratable deliveries on the PL-1 system due to In-Line Inspections required pursuant to regulations of the Pipeline and Hazardous Material Safety Administration (PHMSA) regulations. That critical notice stated that Customers taking unscheduled quantities while the restrictions are in place may be subject to a customer specific OFO and penalties.

As a result of a specific Customer's failure to comply with that critical notice, and its failure to submit an approved burn profile per FERC Order No. 698 and as required per EGTS' Tariff, EGTS now is issuing a Customer Specific OFO pursuant to Section 11B.4 of the General Terms and Conditions (GT&C), effective Gas Day 21 and continuing until further notice. This Action by EGTS is further necessitated by the specific Customer's stated intention of continued non-compliance with EGTS' System Delivery Point Restriction unless an OFO is issued. In order to protect EGTS' ability to maintain the operational integrity of its system, to alleviate conditions that threaten the operational integrity of EGTS' system, to maintain operating conditions necessary for EGTS operations, and to ensure adequate flowing supplies are delivered to specific Receipt Points, EGTS hereby requires the Customer specified below to conform or to equalize its receipts of gas from Pipeline to Customer's confirmed, scheduled nominations pursuant to GT&C Section 11B.4.A.4.d:
Doswell 22500

Failure to comply with this OFO will result in penalties equal to the higher of \$10.00 or two times the Penalty Index Price per Dt taken in violation of the OFO. The Penalty Index Price is defined in Section 1.1.W in the General Terms and Conditions of EGTS's FERC Gas Tariff, as "the highest of the midpoint prices for: "Eastern Gas, South Point", "Transco, zone 5 del.", "Transco, zone 6 N.Y." or "Chicago city-gates" as published in Platts Gas Daily for the flow date applicable to the day on which the penalty is incurred." Note that the Penalty Index Price at this time may be significantly higher than \$10.00. In addition, non-compliance with the OFO could result in service reductions, liability for any damages resulting from failure to comply, and/or the issuance of additional OFOs.
