Subject: OFO Advisory PL-1 FTNN Effective Immediately

Notice Text:

Effective immediately, and continuing until further notice, the following Advisory shall remain in effect on the EGTS system (Supersedes Notice ID: 242683):

Basis for Advisory:

Based on anticipated system utilization and operating conditions, EGTS has determined that hourly quantities delivered to Customers at the Delivery Point(s) listed below may be in excess of the quantities that EGTS can deliver without jeopardizing its ability to provide firm transportation services to other Customers.

Customer Action Required:

EGTS would like to remind all operators/agents of power plants directly served by EGTS of certain parameters of FERC Order 698 requirements. EGTS requires that all power plant operators submit burn profiles and nominations prior to gas flow. Due to limited flexibility on the PL-1 portion of its system, power plant operators are required to remain within their approved burn profiles. The burn profiles should be sent to GT&SSystemsOps-EGTS@bhegts.com. The latest burn profile template can be found by accessing the EGTS web site and following the steps: 1. Go to Informational Postings, Documentation, Power Gen Burn Profile Templates.

In the event this OFO advisory is not sufficient to maintain the operational integrity of the system, EGTS may escalate to an OFO Balancing Alert, Meter/Customer Specific OFO(s) or Hourly OFO(s).

Areas Affected:

Systems in the PL-1 portion of the EGTS operating area. More specifically, the following locations are impacted by this OFO Advisory:

| Location Name | Location |
|----------------------|----------|
| Virginia Natural Gas | 22400 |
| Doswell | 22500 |
| City of Richmond | 22600 |
| VA Electric & Power | 22700 |
| Columbia of Virginia | 22800 |
| VEPCO (Lady Smith) | 22900 |

Please continue to monitor these postings for further updates. If you have any questions, please contact your Customer Transportation Representative or Interstate Marketing Manager.
